# TABLE OF CONTENTS

A-1  **Acronyms and Abbreviations**

S-1  **Stages of Chronic Kidney Disease (CKD)**

## Chapter 1: Nutrition Assessment Charts, Tables and Formulas

1-2  Practical Steps to Nutrition Assessment – Adult Patients

1-3  Nutrition Care Process (NCP) Model

1-4  NCP Overview

1-7  NCP Applications in CKD

1-8  Nutrition Care Process: Nutrition Diagnostic Statements – PES

1-9  KDOQI Assessment and Monitoring Recommendations

1-10  Tips for Effective Assessment, Interviewing and Teaching

1-11  Height Estimation From Knee Height

1-12  Height Estimation From Arm Span/Demi-Span

1-13  Height Estimation From Forearm

1-14  Determination of Frame Size by Elbow Breadth

1-15  Determination of Frame Size by Wrist Circumference

1-16  Patient-Determined Frame Size

1-17  Methods to Determine Body Weights for Nutrient Calculations

1-18  Standard Body Weight

1-19  Metropolitan Life Height and Weight Tables for Adults – Males

1-20  Metropolitan Life Height and Weight Tables for Adults – Females
1-45 SGA Weight/Medical/Nutrition History
1-46 Schematic of Muscle to Guide Assessment of Wasting
1-47 SGA Part I
1-48 SGA Part II
1-50 Criteria for Estimation of Performance or Functional Status
1-51 Medical Nutrition Therapy (MNT)
1-53 Common Physical Signs of Malnutrition
1-55 Centers for Medicare and Medicaid Services (CMS) Conditions for Coverage (CIC)

Chapter 2: Laboratory Values
2-2 General Information
2-3 Conversion Formulas
2-5 Laboratory Tests
2-20 Possible Non-Dietary Causes of Hyperkalemia in Kidney Disease
2-21 Potential Signs and Symptoms of Abnormal Serum Potassium
2-22 Acidosis/Acidemia
2-23 Acidosis/Alkalosis
2-24 Na+/K+ Content of Salt and Salt Substitutes

Chapter 3: Medications
3-2 Medications in CKD
3-3 Antihypertensives
3-6 Antidepressants
3-8 Antilipemics/Antihyperlipidemics
3-10 Anticonvulsants
3-11 Gout Treatments
3-12 Gout Medications
3-13 Nonsteroidal Anti-Inflammatory Drugs
3-14 Potential Nutrition Effects of Common Immunosuppressant Drugs
3-15 Drug-Nutrient Interactions
3-16 Drugs That May Impair Absorption or Utilization of Nutrients
3-17 Drug Actions on Nutrition
3-18 Herbal Supplements
3-19 Potentially Detrimental Herbal Supplements in CKD
3-21 Potentially Beneficial Herbal Supplements in CKD

Chapter 4: Nutrient Prescription
4-2 General Information
4-3 Daily Nutrient Recommendations for CKD
4-5 L-Carnitine Supplementation in Hemodialysis Patients
4-6 Nutritional Effects of HIV/AIDS
4-7 Nutrient Recommendations for AIDS and Dialysis
4-8 Harris-Benedict Formulas for Resting Energy Expenditure (REE)
4-9 Suggested Adjustment Factors for Energy Needs During Acute Illness
4-10 Estimated Energy Needs in Spinal Cord Injury Patients
4-11 Estimates of Calories Absorbed Per Liter From Peritoneal Dialysate
4-13 National Renal Diet Food Choice Lists (CKD Not on Dialysis)
4-14 National Renal Diet Food Choice Lists (CKD on Dialysis)
Chapter 5: Diabetes Mellitus

5-2 Definitions of Diabetes
5-2 Typical Blood Glucose Values
5-3 Common Symptoms and Treatment of Diabetes
5-4 Glycated Hemoglobin (HbA1c)
5-5 Correlation Between HbA1c Level and Mean Plasma Glucose
5-6 Stages of Diabetic Nephropathy
5-8 Screening for Kidney Disease
5-8 Definitions of Albumin Excretion Abnormalities
5-8 Factors That Potentially Influence Microalbuminuria Results
5-9 Recommended Daily Dietary Modification in Diabetic Nephropathy
5-10 Oral Hypoglycemic Agents
5-12 Insulin
5-13 Hypoglycemia in CKD
5-14 Food Glucose Equivalent to 15 gm Carbohydrate
5-15 Modifications for Acute Illness in Insulin-Dependent DM
5-16 Diabetes Management With Intercurrent Issues
5-17 Other Nutrition Issues for Diabetics
5-18 Sugar Alcohol and Non-Nutritive Sweeteners
Chapter 6: Malnutrition

6-2 Descriptive Terms Relating to Abnormal Nutrition
6-4 Protein-Energy Wasting (PEW) in Kidney Disease
6-5 PEW
6-6 ISRNM Indicators for PEW
6-7 Diagnosis of PEW
6-7 ISRNM PEW Evaluation of Weight Loss
6-8 Negative Acute-Phase Reactants
6-9 Positive Acute-Phase Reactants
6-10 Indications and Steps for Implementation of Nutrition Support
6-11 Supplemental Enteral Feeding
6-12 Enteral Nutrition Formulas
6-13 Enteral Nutrition Supplements
6-14 Specialty Nutrition Bars/Cookies
6-15 Specialty Nutrition Products
6-16 Modular Products
6-17 Oral Amino Acid Therapy
6-18 Tube Feedings in CKD
6-20 Common Tube Feeding Sites
6-21 Tube Feeding Formulas
6-22 Common Tube Feeding Products
Chapter 8: CKD Mineral and Bone Disorder
8-2 Bone and Mineral Metabolism Abnormalities in CKD
8-3 KDIGO Definitions of Mineral and Bone Abnormalities in CKD
8-4 Manifestations of Abnormal Mineral and Bone Metabolism
8-5 Abnormal Mineral and Bone States in CKD
8-6 Suggested Target Ranges for Biochemical Markers of CKD-MBD
8-7 Other CKD-MBD Recommendations
8-8 Phosphorus in CKD Stage 5D
8-9 Phosphorus Density of Common Foods
8-11 Phosphorus Food Additives
8-13 Phosphate Binding and Calcium Supplementation
8-14 Calcium Compounds
8-15 Available Phosphate Binder Compounds
8-17 Vitamin D
8-18 25(OH)D Levels and Recommendations in CKD Stages 3-4
8-19 Defining 25(OH)D Insufficiency/Deficiency (Non CKD)
8-20 General Recommendations for Adequate Intake (AI) of Vitamin D
8-21 Food Sources of Vitamin D
8-22 Calcitriol and Analogs of Calcitriol (U.S.)
8-23 Actions of Pharmacologic Agents Used to Treat SHPT
8-24 Protocols for Management of CKD-MBD
8-25 Initial Dosing for Vitamin D Sterols Per HD Treatment
8-26 Cinacalcet (Sensipar)
Chapter 8: Calcium and Phosphorus

8-27 Formulas for Adjusted Calcium
8-28 Symptoms of Abnormal Serum Calcium Levels
8-28 Etiology of Hypercalcemia
8-29 Soft Tissue/Vascular Calcification in CKD
8-31 Potential Indications for Parathyroidectomy
8-32 Common Clinical Course After Parathyroidectomy
8-33 Urolithiasis (Nephrolithiasis/Kidney Stones)
8-34 Nutrition Interventions for Kidney Stones
8-36 Oxalate Content of Common Foods

Chapter 9: Anemia

9-2 Anemia
9-3 Terminology Used to Describe Cell Alterations in Anemia
9-4 Morphologic Types and Characteristics of Anemia
9-5 Laboratory Values Used to Evaluate Anemia in CKD
9-7 Interpretation of Iron Status Parameters
9-8 Diagnosis of Anemia Requiring Further Evaluation
9-8 Anemia in Transplant CKD
9-9 Therapeutic CKD Anemia Targets for Those on ESA
9-10 Iron Supplementation in CKD Patients
9-11 Iron Supplements (Oral)
9-12 Iron Supplements (IV)
9-13 Factors Most Commonly Associated With Hyporesponse to ESA Therapy
10-31 Peritoneal Dialysis Adequacy Targets
10-32 Aspects of Peritoneal Dialysis Adequacy
10-33 Achieving Peritoneal Dialysis Adequacy Targets
10-34 PD Adequacy Calculations – Kt/V
10-35 PD Adequacy Calculations – PNA
10-36 Summary of KDOQI PD Adequacy Guidelines
10-37 Urea Kinetics for CKD Not on Dialysis
10-38 Nutrition Intervention Based on nPNA
10-39 Glomerular Filtration Rate (GFR) Calculations

Chapter 11: Special Populations With CKD (Pediatrics, Pregnancy, Older Adults, Transplant)
11-2 Evaluation of Nutritional Status in Pediatric CKD Patients
11-3 Reference Table Resources
11-4 Indications for Nutrition Intervention
11-5 Energy Needs for Children With CKD Stages 2-5 and 5D
11-6 Macronutrient Ranges for Children With CKD Stages 2-5 and 5D
11-7 Protein Recommendations for Children With CKD Stages 3-5 and 5D
11-8 Vitamins and Trace Elements for Children With CKD Stages 2-5 and 5D
11-9 Elemental Calcium Recommendations for Children With CKD
11-10 Phosphorus Recommendations for Children With CKD Stages 3-5 and 5D
11-11 Higher Than Normal Values for Serum P Based on Age
11-12 Correcting Growth and Metabolic Deficits in Children With CKD Stages 2-5 and 5D
11-13 Calculation of nPCR in Adolescents With CKD Stage 5HD
11-14 Recommendations for the Pregnant Patient With CKD
11-14  Other Recommendations for the Pregnant HD Patient
11-16  Special Issues for the Older Adult CKD Patient
11-18  Potential Influences on Nutritional Status in the Older Adult
11-19  Dialysis in the Older Adult
11-20  Limitations of Common Nutrition Assessment Parameters in Older Adult CKD Patients
11-21  Education Considerations for Older Adults
11-22  Special Issues for the Kidney Transplant Patient
11-23  Nutrient Recommendations for the Kidney Transplant Patient

N-1  Notes
